Project Title: Daily Task Checklist

Problem:

The current curriculum of PSHS Scholars has a heavy academic workload. Many scholars experience getting burned out due to cramming, forgetting activities, or struggling how to manage their time. Take the 8th grade scholars for example, they juggle 13 subjects per week and according to most of them, they experience those things mentioned earlier. This project aims to lessen that experience and help them get through and enjoy their Pisay journey.

Project Objectives:

General Objective:

To make a program that will help students track deadlines and organize the tasks

Specific Objectives:

- Allow users to add, view, and remove tasks.
- Display task details, due dates, and days remaining.
- Displays an angry emoji to indicate a deadline of a task that is too close to its due date or over the deadline.

Planned Features:

- Add task and remove task feature
- Displays an angry emoji when the assignment is nearing its due date
- Has a menu of what you want to do (e.g. View list of task, Add a task, Remove a completed task)

Planned Inputs and Outputs:

- Task
- Date Assigned
- Due Date
- Days Left
- Remove

Logic Plan:

START
  Display menu
  Choose what you want to do

If you chose ‘View task’
‘List of Tasks’ Displays
If you chose ‘Add task’
Input ‘task’
‘List of Tasks’ Displays
If you chose ‘Remove Task’
‘List of Tasks' Displays
Input Remove
If you chose ‘Exit’
Program ends
END
